Artistic Intelligence at the eye of ELIA Biennial 2024

This year's ELIA Biennial explores the theme Arts Plural. Hosted by Nuova Accademia di Belle Arti, ELIA Biennial 2024 explores the power of artistic intelligence and its potential in contemporary society.

Date: 20- 23 November

Location: Milan, Italy

ELIA Biennial 2024, hosted by [Nuova Accademia di Belle Arti](#), with this year's theme Arts Plural, aims to ask how arts education can contribute to society in a more pluralistic way and what structures are necessary for artistic intelligence to address planetary problems. Every artist and designer possess a particular form of intelligence. Although considered powerful in certain circles, artistic intelligence is frequently undefined or misread. However, as a system of capacities for perception, insight, sensing, creating, and decision-making, it has been driving human evolution beyond boundaries for centuries. But how do we define artistic intelligence and its possibilities in a contemporary context?

Artists, designers, students and educators are welcome to join engaging discussions about the role of artistic intelligence in politics, ethics, ecology, technology and sustainability and have the chance to connect with fellow artists and educators in Milan.

ELIA Biennial Conference pricing structure offers individual passes and Institution Packages. Currently, online participation is only available to institutions who purchase packages. Online passes will be made available at a later date.

Final registration deadline: 6 November 2024

For more information and to register visit the ELIA Biennial
