Code of Resistance: Gaming's Labor Uprising Sweeps France and Spain

French and Spanish video game developers unite in historic strikes, challenging industry norms, demanding better working conditions, and protesting corporate mandates that threaten worker rights and creative autonomy.

On 14th February 2024, French and Spanish video game developers united in historic strikes, challenging industry norms, demanding better working conditions, and protesting corporate mandates that threaten worker rights and creative autonomy.

Ubisoft in the spotlight

Ubisoft is the most prominent company in the industry, facing criticism for its corporate mandates and lack of transparency. The company's actions are being scrutinized by the public and the media.

A thriving industry in crisis
