CulturEU Funding Guide

CREATIVESUNITE

Co-funded by
the European Union

The European Commission published a guide to ease access to the funding opportunities available for the cultural and creative sectors across all the funding sources of the European Union available in 2021-2027.

Discover funding opportunities for the Cultural and Creative Sectors. The guide will help you find the right funding opportunity for you, based on the sector you are working in, type of organisation and the support you are looking for.

The aim is to help players in these sectors identify the most suitable sources of EU support for their projects.

How it works

Answer a series of questions based on the sector you are working in, the type of organisation, and the support you are looking for. The results will enable you to narrow down the relevant funding sources and calls available that best suit you.

The results will be accompanied by the available budgets, application process of the different funding sources and a link to the specific programme or calls.

Browse the guide here.
