## Distributed Design Awards

The 7th Distributed Design Awards are now open for entries! Designers and makers across Europe are invited to submit their innovative, sustainable, and socially-conscious projects for a chance to win prestigious prizes.

&nbsp;

The [Distributed Design Awards](#) celebrate the creative, mind-shifting and responsible design responses to the post-industrial design paradigm. We recognize multidisciplinary, innovative and sustainable designs from Europe's makers, designers and creatives.

Join the seventh edition of the Distributed Design Awards!

We are looking for design initiatives that incorporate the principles of distributed design, circular economy, social challenges, and human well-being. The call has just launched and is open until June 30th, and the winner will receive a prize of €2,000 to support their project.

This year winners will be awarded prestigious prizes from renowned sponsors like [WASP](#) and [Kniterate](#). They will also have opportunities for sponsorship to join the next [Fabricademy](#) and [Fab Academy](#) academic year at the [Fab Lab Barcelona](#) node. Winners have the chance to win a [Smart Citizen Starter Kit](#) and be mentioned in EU research projects such as [CitiObs](#) and [More4Nature](#).

The winners will also gain valuable exposure through media coverage, exhibitions at Vienna Design Week 2024, and inclusion in the Distributed Design Awards online gallery.
