EIT Culture & Creativity | Online Survey for the CCS

Impact Hub and European Creative Hubs Network are inviting you to take part in a survey about mapping the key start-up incubation and innovation support dynamics for the European CCSI.

In the context of EIT Culture & Creativity, [Impact Hub](#) & [European Creative Hubs Network](#) are launching a survey dedicated to mapping the key start-up incubation and innovation support dynamics for the European CCSI (cultural and creative sectors and industries).

This mapping will serve as the basis for the next phase, consisting of three online workshops.

The focus of these workshops will be the identification of commonalities and differences on support programme elements resulting in an analysis of incubation success factors.

The data collected through both survey and workshops will be used to inform and shape future good practices and alternative pathways in the field, leading to the setup of the first EIT incubators.

We estimate that the survey will take 15-20 minutes to complete.

Fill the survey [here](#).
