Explore Creative Europe's tool for EU-funded projects

Discover Creative Europe success stories, projects with exceptional policy relevance or communication impact, and find inspiration for your own projects.

Creative Europe is the European Union programme that supports the culture and audio-visual sectors. But did you know that it also offers a tool to help you find all the available projects that currently exist in Europe? [Creative Europe Project Results Platform](#) is a searchable database of EU-funded projects showcasing the impact, benefits and concrete results of the programme.

Creative Europe created a video to help artists and creatives navigate through the platform and learn how to search for information and results on Creative Europe Projects. The platform gives you the opportunity to look for potential partners or boost the visibility of your project by sharing its results. All the projects listed are funded under the Culture, MEDIA and Cross-sectoral strands of the Creative Europe programme.

The short video published by Creative Europe explains to the user how to search for existing Creative Europe projects and their results according to topic, field, or region by using its search capabilities such as filters and the interactive map. You can discover the impact, benefits, and concrete results of current and past Creative Europe-funded projects, as well as the contact details of organisations involved. Explore good practices, exceptional outcomes and stories of innovative projects and download them as a booklet for reference or as inspiration for developing your own Creative Europe project.

Take a look at the demonstration on how to use the Creative Europe Project Results Platform and get the chance to explore it yourself!
