# Green Film Lab 2025: Sustainability Training for Film and TV Professionals

CREATIVESUNITE

Co-funded by the European Union

# Green Film Lab 2025 invites film and series industry professionals and sustainability consultants to its Budapest workshop from April 25–27, 2025, focusing on implementing sustainable practices on set. Organized by TorinoFilmLab and Green Film, the lab offers practical insights into green production protocols and certification processes.

Deadline for Applications: February 21, 2025, 2:00 PM CET

Event Dates: April 25–27, 2025
Location: Budapest, Hungary
Who is it for: Film and series industry professionals, environmental management experts, and film institution delegates interested in sustainability

Apply here.

About the Workshop

Green Film Lab is a hands-on training program designed to promote environmentally sustainable practices in the film and TV industry. Participants will learn to apply green protocols during production and gain certification, ensuring their projects meet sustainability goals.

Who Can Apply

- Film and series professionals (producers, line producers, heads of department, writers, directors) with or without a project
- Sustainability consultants aiming to transition to the audiovisual industry
- Professionals already working on sustainable film and series production
- Delegates from film commissions, funds, or institutions interested in sustainability

What to Expect

Participants will explore sustainability in early development, pre-production, and production phases. The program includes interactive workshops, networking dinners, and final wrap-up sessions.

Key Details

Participation Fee: €300 (+ VAT if applicable). Includes training and meals; travel and accommodation costs are excluded.

Scholarships:

ACE Producers & EAVE Scholarship: Covers half the participation fee for one project team from the ACE or EAVE networks.

Learn more about the application details and Green Film Lab schedule on the official website.
