GreenCCIrcle Skills Survey: Assessing Capabilities for Sustainable Development

CREATIVESUNITE

Co-funded by the European Union

A survey aims to learn about the skills and knowledge gaps of professionals, educators, and others in creative industries (CCI). The results will be used to create educational materials to support Europe's sustainable development and Green Deal goals.

The GreenCCIrcle survey aims to learn more about the skills and knowledge gaps that professionals, educators, and others in these industries have. This will help the survey creators make better plans for sustainable development in different parts of society.

The survey results will be used to create educational materials for anyone who wants to help Europe achieve its major goals for sustainable development and the European Green Deal. These materials will be useful for facilitators, educators, and consultants.

You can take the survey here
