Julie's Bicycle | Creative Climate Justice Films

Culture has always mobilised change, yet has been largely absent from climate strategy. This film series explores arts and culture as a movement, as an ecosystem of different parts - the artists, activists, organisations, policies and more, at the heart of climate action.

Featuring 14 global voices from nine countries, this series of Creative Climate justice films focuses on those working across arts and culture and bears witness to climate justice issues as the lens to engage the arts.

The four themes they have gathered around for these films are:

- MESSAGES FOR COP26
- YOUTH & FUTURE FOCUS
- CLIMATE IMPACTS
- CREATIVE CLIMATE RESPONSES

Watch the films [here](#).
