The Culturethèque digital library

Culturethèque offers major titles from the French press, comic strips, music albums, novels, essays on current themes (environmental issues, city-world & urban changes), self-study modules in French as a foreign language (FLE), books and comics for FLE learners (all levels), humanities articles, conferences, web documentaries and video games.

Since the lockdown, the platform was opened very widely to the public of the network's institutions and used by teachers to enrich their distance learning courses. Cultural productions in French are accessible in 130 countries for members of the French cultural network establishments abroad (Alliances françaises and Instituts français). A discovery offer is also available.
